

## Year-round use on fields and grassland

Fight european corn borer after corn silage

GÜTTLER® roller in front for cultivation

## Valuable soil moisture is preserved

New grass seeding without ploughing

Processing stubbles of colza

## Year-round versatile useable:

- ✓ Roll on high-frozen winter crops in early spring, stimulate tillering
- ✓ Rolling before or after sowing
- ✓ In front and rear mounting
- ✓ Processing stubbles of colza
- ✓ Rolling catch crops
- ✓ Grassland care
- ✓ New sowing
- ✓ Cultivating catch crops

## Today we milk 5.050 kg of milk from forage

*Mr. M Heckenberger has increased the output of his 60 cow dairy herd by about 3.800 kg. Without using more concentrated feed. The rise in production comes mainly from increasing the quantity and quality of his basic forage, thanks to intensive forage and pasture improvement with GÜTTLER's GreenMaster system.*

*„Today we milk 5.050 kg of milk from forage“ says Heckenberger satisfied. „And we cut costs!“ The consumption of concentrated feed decreased from 430 g/kg of milk in 2008 to only 225 g. A positive side effect: Healthier animals, our cull rate has been cut in half, down to 20%!*

*The farmer with a master's degree and winner of the 2015 CERES Award (young farmers category) runs a dairy farm in Biberach (Southern Germany).*

## Best suited for both overseeding and new seeding

*Practical test GreenMaster – at the Teaching and Research Institute LFZ Raumberg-Gumpenstein, Austria*

## From agriculture to grassland

GÜTTLER® is a pioneer of „soil reconsolidation“. When Fritz GÜTTLER developed and patented the prism rings in 1976, the guiding principle was the primary idea of creating an ideal soil structure for a seed bed.

The rollers with the „Golden Hooves“ has meanwhile become a well known concept. Since 2002 it is also an important element on pastures! With working widths from 1.50 m to 9.40 m.

# GreenMaster 300

The modular solution from GÜTTLER® for maintaining your pastures and hay fields, re-seeding, renovation and seeding.

## Leading in soil structure

GÜTTLER® GmbH  
Karl-Arnold-Straße 10 • D-73230 Kirchheim/Teck  
+49 (0) 70 21 98 57-0 • info@guettler.de • www.guettler.de

## The modular system allows you to be flexible

The most compact and versatile machine on the market – towing, rolling and sowing:  
The GreenMaster system components can be purchased individually or in combination and used variably!

Start with a  
**GÜTTLER® roller ...**  
Aulendorf system

... enhance this  
with the **pneumatic seeder ...**  
Aulendorf system

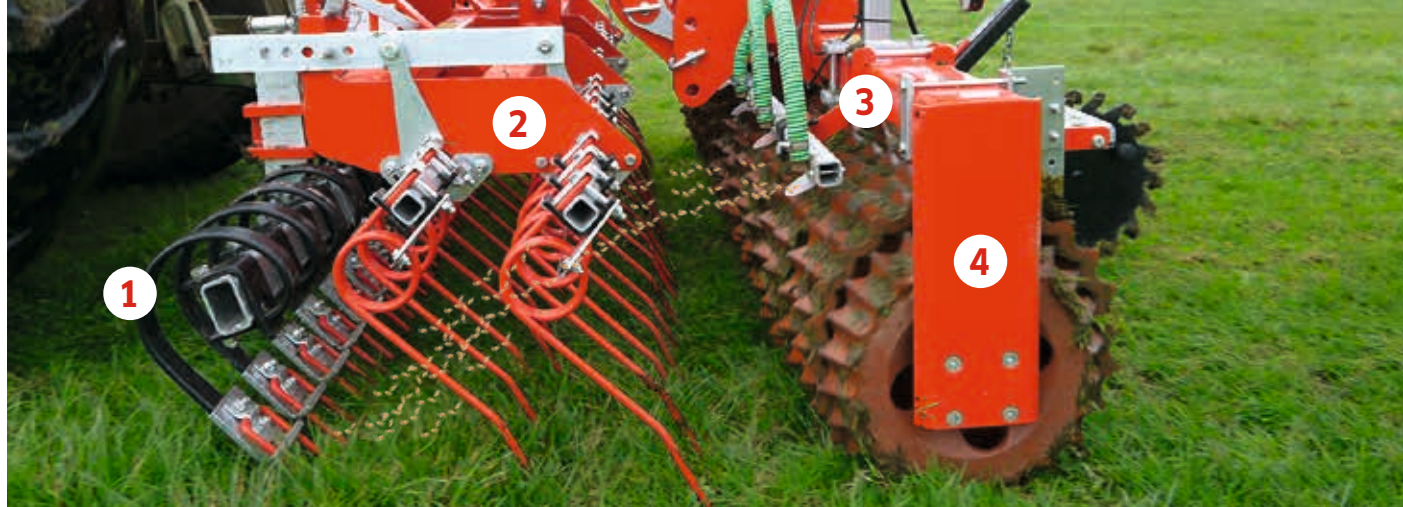

... with the  
**HarroFlex harrow ...**

- for towing
- for aerating matted turf

... up to the complete  
**GreenMaster.**

- for grassland maintenance
- for new sowing
- for catch crops

### 1 The shortest four-row harrow on the market (with Ripperboard)

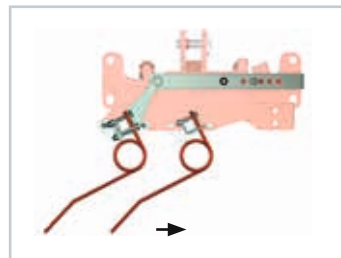

**Ripperboard** for renovation:  
doubles the number of tines  
and the efficiency (optional)

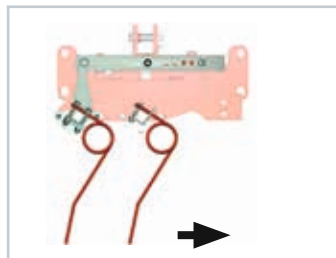

**Leveling bar** with parallelogram  
for ground adaptation  
and overload protection

### 2 Quick adjustments from softly stroking to biting aggressively

**Simple and central tine adjustment:**  
with few hand movements, you can  
adjust the entire harrow.

### 3 Pneumatic seeder

**Pneumatic seeder**  
Path-dependent dosing over  
ground. Simple and robust

**Calibration test**  
Simple handling, electric seed  
rate adjustment on demand

### 4 The GÜTTLER® roller

**Matador Ø 45/50**  
The all-rounder for grassland  
and agriculture

**Mediana Ø 33/38**  
For grassland on steep slopes  
or for light tractors

## The rollers with the “Golden Hooves”

Our grandfathers already knew: “When the animals go to pasture, their hoof prints

- create a denser turf
- bring reseeding safely to the soil!”

It's exactly this sheep-foot effect that you take advantage of with the GÜTTLER® roller with 305 prism tips per square meter!

The rollers with the  
“Golden Hooves”  
The Original. Since 1978

## GreenMaster Alpin

Balanced weight distribution, low centre of gravity: the Alpin series is reliable and safe even on steep slopes.

The modular 3 metre front / rear combination can be repositioned at any time to the classic GreenMaster 300 rear-mounted.

**Dyke maintenance**  
Optimal weight distribution safe working even with light tractors
